Title: Closed-phase glottal inverse filtering by means of a compound auto-regressive model

Author(s): Schoentgen, J.; Azami, Z.

Author Affiliation: Inst. of Phonetics, Univ. Libre de Bruxelles, Belgium
p.209-12

Publisher: IDIAP, Martigny, Switzerland

Publication Date: 1994 Country of Publication: Switzerland xii+238
pp.

Conference Title: Proceedings of Workshop on Automatic Speaker Recognition, Identification and Verification

Conference Date: 5-7 April 1994 Conference Location: Martigny, Switzerland

Language: English Document Type: Conference Paper (PA)

Treatment: Theoretical (T); Experimental (X)

Abstract: The article concerns techniques for obtaining, representing and comparing voice source signals. Closed-phase **formant frequencies** and bandwidths were estimated by fitting two linear auto-regressive models to a glottal cycle (the first to the open, the second to the closed phase). The moment of switching from one sub-model to the next was automatically determined by minimizing the overall modelling error. The voice source signal was obtained by inverse filtering speech by means of the closed-phase formants. Its spectrum was represented by a nonlinear zero-memory Volterra model. Two source signals were compared by means of their **minimal spectral distance** which was obtained by **adjusting** the nonlinear gain of the Volterra model. (6 Refs)

Subfile: B C

Descriptors: acoustic analysis; autoregressive processes; filtering theory; frequency estimation; signal representation; speaker recognition; speech processing

Identifiers: closed-phase glottal inverse filtering; compound auto-regressive model; voice source signals; closed-phase **formant frequencies**; closed-phase formant bandwidths; linear auto-regressive models; sub-model; overall modelling error; inverse filtering; nonlinear zero-memory Volterra model; minimal spectral distance; nonlinear gain; speaker recognition

Class Codes: B6130 (Speech analysis and processing techniques); C1250C (Speech recognition); C5260S (Speech processing techniques)
